A318 - A320 Family - Airbus

The first member of the A320 aircraft family was the A320, which first flew on 22 February 1987 after the program was launched

in March 1984. The family was soon extended to include the stretched A321 (first delivery 1994), the shortened A319 (first delivery 1996), and the further shortened A318 (first delivery 2003).

to be NEOs, and thus their names would go on to be A319neo,

A320neo, and A321neo.

The A318 –

affectionately given the nickname ‘baby bus’ –

was never that popular to begin with. Thus

Airbus never put the resources into

developing a NEO

variant of the tiny jet.

is a family of jet airliners. It only has two rows of seats, which means it is a narrow-body plane. The family is made by Airbus and it is made up of the A318, A319, A320 and A321, as well as the ACJ business jet. The A320 family is made in Toulouse, France, and Hamburg, Germany.

Additionally, the A321 has a slightly increased wing surface area. The A318 was an unsuccessful attempt by Airbus to make an RJ (regional jet), but their current RJ, the 'A220' is in fact the Bombardier C Series. To cut a long story short,

Bombardier was unsuccessful at selling these aircraft, so Airbus took a 50.1% stake in the programme.
