This is an enormously simple means to specifically acquire guide by on-line. This online broadcast activity rule of 72 with answers can be one of the options to accompany you once having supplementary time.

Activity Rule Of 72 With Answers - electionsdev.calmatters.org

The Rule of 72 works as follows. If we want to know how long it will take for our money to double, just divide `72` by the interest rate. So for example, if the interest rate is `10%`, $72 \div 10 = 7.2$ years. So it will take just over `7` years to double our money. If the interest rate is `8%`, to double our money it will take. $72 \div 8 = 9$ years

BizBasics: "The Rule of 72" with Peter Rodriguez - YouTube

Remember, the Rule of 72 is an approximation, but it's a remarkably accurate one we can use with confidence for our Rule #1 calculations. The exact number of years it takes to double once at a 24% growth rate is 3.2 years, which is to say that the Rule of 72 is very accurate around 10% but gets less accurate the farther from 10% we go.
