Sure, '351' refers to the engine size, but there were essentially three major versions of the Ford 351—the Windsor, Cleveland, and Modified*. *Officially, Ford never called these engines 400/351 Modified or 400M/351M. "Modified" was a slang designation originally applied by Ford enthusiasts, and the name just stuck. You'll also hear folks define the "M" as "Michigan" after the engine's original casting plant. The etymology doesn't really matter, it's just a way for ...

What's the Difference Between a Ford 351 Windsor ...

351 Modified. 351 Modified Engine The 351M is part of the same Ford 335 V8 engine series as the 351 Cleveland. It's based on the 400 Modified engine (see note on nomenclature in the opening paragraph), which was essentially a 351C with a longer stroke. Unlike the 351C however, the 400 blocks had the bellhousing bolt pattern of 385-series big blocks.

What's the Difference Between the Ford 351 Windsor ...

351M. When the 351 Cleveland was discontinued after the 1974 model year, Ford needed another engine in that size range, since the production of the 351 Windsor was not sufficient. Ford took the 400 engine's tall-deck block and de-stroked it with a shorter 3.5 in (89 mm) stroke crankshaft to produce a 351 cubic inch (5.8 L) engine.

The Confusion of the 351M/400 Ford Engines - Modern Driveline

The were two engine types in the Ford engine design family known as the 335 series, the 351 Cleveland and the M-block. There were several variants of the 351 Cleveland (351C) engine, but there were only two M-block variants, the 351M and 400.

High Performance Options for the 351M/400 Engine - Ford ...

Ford also needed an engine that could be used in trucks and large vehicles, and utilize their existing heavy-duty transmissions. The 351C would not work due to its small-block "Windsor" bellhousing bolt pattern. Engineers took the Cleveland motor as a starting point and modified it in several ways: 400 cid.

351C, 351M, or 400 Ford Engine - What is the difference ...

The potent 351C-4V can often be found under the hood of unsuspecting vehicles such as this 1972 Torino. Engineers took the Cleveland motor as a starting point and modified it in several ways: 400 cid. Bellhousing pattern same as 429/460 (to allow use of already existing heavy-duty transmissions).

Later Ford destroyed the 400 to 3.5" and that gave them a third 351 cubic inch engine - what we know of as the 351M. However, the origins of the "M" are shrouded in mystery. Some say it stands for Michigan and some say Modified, and no one seems to know for sure.

351M AND 400 - Gary's Garagemahal (the Bullnose bible)

The final Ford 351 ci engine is likely the most misunderstood of the bunch. It's commonly referred to as the 351 Modified, which muddies the waters a bit, but you'll soon see the term "modified" is used in a literal sense. Some claim, instead, that the M refers to the Michigan Casting Center where the blocks originated.

Straightening Out Ford's 351 ci Engines | Rare Car Network

The Ford 335 engine family was a group of engines built by the Ford Motor Company between 1969 and 1982. The "335" designation reflected Ford management's decision to produce an engine of that size with room for expansion during its development. This engine family began production in late 1969 with a 351 cu in engine, commonly called the 351C. It later expanded to include a 400 cu in engine which used a taller version of the engine block, commonly referred to as a tall deck engine block, a 351 c

Ford 351W Crate Engines | Ford High Performance Crate ...

The quickest way to identify a Ford 351 Windsor engine is to count the number of bolts on the valve covers. The valve covers are located on the top of the engine, one on either side of the air cleaner, and each will have six bolts. If the valve cover is removed, you will see "351" stamped on the cylinder head in the valve valley.

Ford 351W Block Identification | It Still Runs

While technically considered a small block engine in the same family as the 289 and 302-cubic inch engines, the 351-cubic inch V-8 has a taller block, larger connecting rods and a larger crankshaft. The 351 also has a firing order of 1-3-7-2-6-5-4-8 as opposed to the standard 1-5-4-2-6-3-7-8 Ford V-8 engines.

How to Time a Ford 351 | It Still Runs

Ford Racing BOSS Blocks BOSS 351 ENGINE BLOCK 9.5" DECK - Ford Motor Company The Ford 351M engine is a part of Ford's 335-series family of engines. The M was used to differentiate the engine from the previous 351 engines. The 351M is a sharp break from the other 351 engines because it is more similar to the Ford 400 engine.

Ford 351 Modified Engine - rmap.youthmanual.com

Ford 351C, 351M and 400M Firing Order Here is the firing order for the 351C (Cleveland), 351M (Michigan) and 400M engines. These lumps of iron are a completely different block than the standard SBF (289, 302, 351W) engines. The cylinder heads have canted valves like the Big Block Chevy.
