Compared to a traditional manual transmission.

Traditional automatic transmissions can also beat manual fuel economy. Today's automatics tend to have more forward gears (those are gears that move the car forward, not in reverse) than manual transmissions do.

Which has better fuel economy: manual or automatic

...

Manual gearboxes are straightforward - you manually change gear using the clutch and gearstick. But many cars labelled as 'automatic' aren't straightforward. They might

# Read Book Manual And Automatic Transmission

change gears automatically, but they aren't all fitted with 'traditional' automatic gearboxes. In many automatic cars you can change gears manually too.

Automatic vs manual - which should you buy? | Parkers  
Some drivers believe a CVT provides a smoother experience compared to a traditional automatic transmission or a manual transmission. But the biggest advantage is that they're more fuel efficient than a conventional automatic; this is why you've seen automakers put them in dozens of models in the past decade.

**Comparison**  
A manual transmission requires the driver to operate the gear stick and clutch in order to change gears (unlike an automatic transmission or semi-automatic transmission, where one or both of these functions are automated). Most manual transmissions for cars allow the driver to select any gear ratio at any time, for example shifting from 2nd to 4th gear, or 5th to 3rd gear.

Manual transmission -  
Wikipedia

With semi-automatic transmission, you can usually choose between fully automatic and manual modes.
